### **RFIs F19-03 – District Wide Marquee Replacement**

1. Are we replacing the marquee below the football or just replacing the neon on the football? Also what the 6' x 24' size is for what project? Please advise

**District Response:** The scope of work for the modifications to the existing marquee at San Bernardino High School is to reestablish the neon tubing. The referenced 6'x24' dimensions represent the general overall height and width of the football shaped marquee.

2. It states "Message Center capable of 4 lines of text or a Minimum of 5" character text and a minimum of 15 characters per line." Are you only trying to display TEXT and will RGB be good enough for what you are calling "Multi Color"

**District Response:** Our expectation is to display multi-color LED graphics and text on the message center cabinet.

3. Do you want them designed similar to what you already have at most of these schools? The message center is bigger than the school logo and graphics.

**District Response:** Yes, the message center should be larger than the school logo and graphic, which is similar to many other marquees within our school district.

4. You are asking for cost for LIN ft. of CAT 6 so we assume all units to be hardwired?

**District Response:** Yes, all units should be considered to be hardwired, unless noted otherwise.

5. Do you want design similar to most of the Optec Displays you already have now?

**District Response:** We are aware that the technology has been advancing quickly, therefore, we do not want to limit ourselves. Our expectation is that the marquees will be similar to many other marquees within our district.

6. Bid #19 you ask for a Corrugated Metal Pole? These are usually very small poles used for Stop signs and traffic signs. Are you sure of the pole type? Also will this be single pole or double pole?

**District Response:** The reference is regarding a "corrugated metal pole cover." The poles or posts should be provided based on the structural engineering.

7. The Structural engineer says he needs an address so he can calc wind loads to give his quote. Do you have a list of the address we will be installing.

**District Response:** Specific site locations have not been determined. The school site locations will be determined based on need. This bid will be a district wide bid that can be applied to any district site.

8. Will there be any removal of existing signage at any of the locations?

**District Response:** We will evaluate each existing marquee individually to determine if it is in our best interest to refurbish or remove and replace the unit. Please reference Line Item #11.

9. Items # 1 & 2 on bid form page 2, items state: run 100 linear ft of  $\frac{3}{4}$  rigid conduit with wiring and/or Cat6 connections. Installation of  $\frac{3}{4}$  rigid conduit is for typically surface mount applications not underground. Please clarify if  $\frac{3}{4}$  rigid conduit is to be surface mount or installed underground with  $\frac{3}{4}$  PVC conduit.

**District Response:** Line items have been added for 100 linear feet of  $\frac{3}{4}$ " schedule 40 PVC conduit for underground applications.

10. The bid calls out approvals being needed for the wall signs. Are you meaning DSA PC? Our structural engineering is struggling with how to get DSA PC for a wall that is already built. We would have to design/engineer a mount for each specific project. If so, then we could entertain bidding this project for you. If PC wall sign is required, then we have no choice than to not bid unfortunately.

**District Response:** The School District is not requesting DSA approval or a DSA PC unless limits specified in DSA IR A-10 are exceeded.

### **RFIs F19-03 – District Wide Marquee Replacement**

1. Are we replacing the marquee below the football or just replacing the neon on the football? Also what the 6' x 24' size is for what project? Please advise

**District Response:** The scope of work for the modifications to the existing marquee at San Bernardino High School is to reestablish the neon tubing. The referenced 6'x24' dimensions represent the general overall height and width of the football shaped marquee.

2. It states "Message Center capable of 4 lines of text or a Minimum of 5" character text and a minimum of 15 characters per line." Are you only trying to display TEXT and will RGB be good enough for what you are calling "Multi Color"

**District Response:** Our expectation is to display multi-color LED graphics and text on the message center cabinet.

3. Do you want them designed similar to what you already have at most of these schools? The message center is bigger than the school logo and graphics.

**District Response:** Yes, the message center should be larger than the school logo and graphic, which is similar to many other marquees within our school district.

4. You are asking for cost for LIN ft. of CAT 6 so we assume all units to be hardwired?

**District Response:** Yes, all units should be considered to be hardwired, unless noted otherwise.

5. Do you want design similar to most of the Optec Displays you already have now?

**District Response:** We are aware that the technology has been advancing quickly, therefore, we do not want to limit ourselves. Our expectation is that the marquees will be similar to many other marquees within our district.

6. Bid #19 you ask for a Corrugated Metal Pole? These are usually very small poles used for Stop signs and traffic signs. Are you sure of the pole type? Also will this be single pole or double pole?

**District Response:** The reference is regarding a "corrugated metal pole cover." The poles or posts should be provided based on the structural engineering.

7. The Structural engineer says he needs an address so he can calc wind loads to give his quote. Do you have a list of the address we will be installing.

**District Response:** Specific site locations have not been determined. The school site locations will be determined based on need. This bid will be a district wide bid that can be applied to any district site.

8. Will there be any removal of existing signage at any of the locations?

**District Response:** We will evaluate each existing marquee individually to determine if it is in our best interest to refurbish or remove and replace the unit. Please reference Line Item #11.

9. Items # 1 & 2 on bid form page 2, items state: run 100 linear ft of  $\frac{3}{4}$  rigid conduit with wiring and/or Cat6 connections. Installation of  $\frac{3}{4}$  rigid conduit is for typically surface mount applications not underground. Please clarify if  $\frac{3}{4}$  rigid conduit is to be surface mount or installed underground with  $\frac{3}{4}$  PVC conduit.

**District Response:** Line items have been added for 100 linear feet of  $\frac{3}{4}$ " schedule 40 PVC conduit for underground applications.

10. The bid calls out approvals being needed for the wall signs. Are you meaning DSA PC? Our structural engineering is struggling with how to get DSA PC for a wall that is already built. We would have to design/engineer a mount for each specific project. If so, then we could entertain bidding this project for you. If PC wall sign is required, then we have no choice than to not bid unfortunately.

**District Response:** The School District is not requesting DSA approval or a DSA PC unless limits specified in DSA IR A-10 are exceeded.
